To evaluate clinical features, MRI, and surgical outcomes of craniopharyngiomas, and investigate the effect of cyst component on clinical features and surgical outcomes. Retrospective case series. Inclusion criteria were adult patients who were confirmed as craniopharyngioma pathologically and underwent surgical removal at our hospital from January 2009 to December 2015. The clinical features, MRI findings, surgical treatment, and postoperative results were retrospectively evaluated. Among 55 patients with craniopharyngioma, 39 had solid tumors and 16 had cystic tumors. Female patients outnumbered male patients (32 vs. 13, P 0.05). Patients with cystic tumor showed earlier progression to the next phase than those with solid tumor (P 0.05). The overall symptom relief rate was 76.2%. Hypointense lesions on T1 and hyperintense lesions on T2 were more common in patients with cystic tumor (P Prediction of the biological effects of rifampicin and its main metabolite by in silico, in vitro and in vivo studies. Rifampicin (RIF) is an antimicrobial agent of the thiazolo-carboximidiazepine class used for the treatment of tuberculosis, leprosy and bacterial pneumonia. In

I. Coronary heart disease]. Symptoms of coronary heart disease (CHD) may be arterial or conduction system disease. Arterial disease is characterized by angina, myocardial infarction, pulmonary edema and collapse. In contrast, the symptoms of conduction system disease are similar to pericarditis; they are accompanied by chest pain, syncope, exercise related or spontaneous ventricular tachycardia. The symptoms are well specific. However, the diagnosis is not yet possible for the majority of patients. The diagnosis should be confirmed by a coronary angiography and in case of a stenosis with more than 50% a coronary bypass should be indicated. Patients with contraindications to coronary angiography can be treated with a percutaneous transluminal coronary angioplasty (PTCA). In case of an unsuccessful PTCA, coronary angiography or a revascularization should be indicated.Q: Difference between parseFloat and parseInt in Javascript I have array with non-integer values like in the code below var arr = ['18011028', '06111110', '19031007', '18011028', '08011010', '20111019', '18011104', '01110714', '06011129', '19031028', '19030109', '19030110', '19031007', '19030110', '19030120', '06010903', '06110623', '18011013', '18011014', '18011020', '18011008', '18011009', '1801 f678ea9f9e
