iMuscle Home is a video guided app that combines the best aspects of a video fitness program, a high quality simulated physical workout, and highly customizable home exercise apps. An extremely detailed user interface makes it possible for users to efficiently visualize their movements and the movements of a particular muscle group and compose custom workouts. More than 280 exercises can be created in total. Browse through exercises by muscle groups, compound and isolation exercises. " Do you have any workout suggestions for me? " Here's a few of my favorite routine with examples for each exercise. You'll want to do each exercise once through, in order, then do the same exercise back to back for two reps. This is because with standard repetitions, you don't get the fastest gains. One for 5 reps will not build very much muscle. For most people, doing these exercises 2 to 3 times per week will be enough to keep you motivated. For someone serious about weight loss and/or making specific muscle gains, then they would need to do a little more. Forget about doing boring, ineffective weight training regimens... **Videos can be found @ ** Facebook: Twitter: Instagram: " It's more enjoyable than going to the gym " As you can see in the videos I mentioned, it's more enjoyable than going to the gym. With free workouts on demand and instant feedback, you can literally workout while you do other things like talk on the phone, go to work, or deal with a child crying. The fact that I spend all my time with the computer on a typical day is a testament of the effectiveness of the application and how it can benefit the busiest of us. With iMuscle Home, you can spend almost zero time at the gym, yet get great results and see great progress. Unlike generic programs on the market, iMuscle Home takes you behind the scenes and explains each exercise in great detail, and it provides contextual information on how to maximize your gains and how to improve your body. I hope you enjoy the videos and workouts as much as I enjoyed filming them! " Video on iMuscle Home ***** How it works *********** "

What's New In IMuscle Home?

iMuscle is a full-featured home workout app that is designed to help you train on your own. It's the only in-app app you will ever need to know how to perform proper exercises. Simply pick the muscle group you want to strengthen, pick any exercise you want to perform and add it to your favorites list. It also contains more than 280 exercises, more than any other app on the market. One of the best features about iMuscle Home is its pain-free design - no painful stretching exercises, no tedious app size, no water-heavy, multi-vendor nature - none of these factors can be found in this program. iMuscle Home is designed in a simple and beautiful fashion. It features multiple exercise models, including detailed anatomical models, so that you can see how the muscle moves and will perform. You can test out a particular exercise without costing you a penny. It also features more than 280 exercises that are designed in an easy-to-follow format and a unique color system that shows how many reps you need to perform each. To help you understand how to perform each exercise, there are videos that explain the three steps of each exercise, letting you see a live demonstration of the motion. Conclusion: iMuscle Home is a free application that you can use to keep up with your home-based workout routine. The application is well-designed and easy to use. Its target audience is the less-confident gym-goers or individuals who want to keep up with their fitness routine at home and still keep the cost low. It features in-app videos, explanations, and exercise tutorials to help you throughout the process. With 280 exercises, iMuscle Home is the only free program that offers you more than any other program on the market. 3D Body Builder is the free version of the paid 3D Body Builder, which is one of the most famous app in the genre.
